

IN THE HON'BLE NATIONAL GREEN TRIBUNAL
Application Number 21 OF 2014

IN THE MATTER OF

Shri Vardhaman Kaushik Petitioner

Versus

Union of India & Others.....Respondents

INDEX

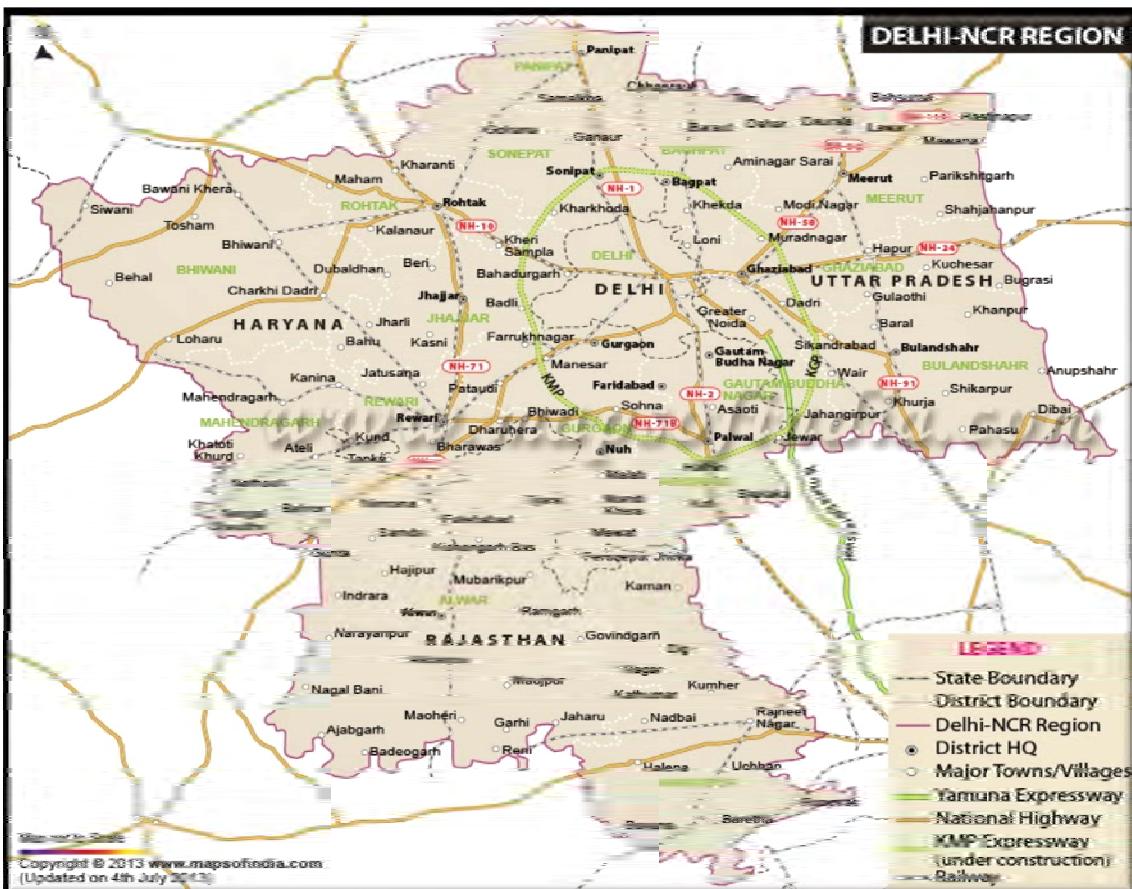

Sl. No.		
1.	Annexure: Associated (index) documents of Respondent No. 2, the Central Pollution Control Board, Delhi-110032, along with Final Report on Ambient Air Quality Status in the National Capital Region (NCR), in compliance of the Hon'ble National Green Tribunal Order, dated 4 th December 2014 and 19 th January 2015	
2.	Annexure-I: Minutes of the meeting held on 26.12.2014 at CPCB	
3.	Annexure-II: Minutes of the meeting held on 11.02.2015 at MOEF&CC	
4.	Annexure-III: Inspection report of alleged Hot Mixture Plants in and around Vikas Marg area of Delhi	

DELHI
DATED: 24.02.2015

(Dr. Sanjeev Agrawal)
Scientist D, CPCB
PAMS Division

**FINAL REPORT ON
AIR QUALITY STATUS IN THE National
Capital Region**

*As per Hon'ble National Green Tribunal order in the application No. 21 of 2014
(In the matter of Vardhman Kaushik Vs. Union of India)*

1.0 INTRODUCTION

Delhi, also known as the National Capital Territory of India is the capital territory of India. Such is the nature of urban expansion in Delhi that its growth has expanded beyond the NCT to incorporate towns in neighboring states and at its largest extent can count a population of about 25 million residents as of 2014, and is the largest urban agglomeration in India by land area and population. The NCT and its urban region have been given the special status of National Capital Region (NCR) under the Constitution of India's 69th amendment act of 1991. The NCR includes the neighbouring cities of Gurgaon, Noida, Ghaziabad, Faridabad, Neharpar (Greater Faridabad), and Greater Noida, Sonepat, Panipat, Karnal, Rohtak, Bhiwani, Rewari, Baghpat, Meerut, Alwar, Bharatpur and other nearby towns.

Delhi and its nearby territories are together called the National Capital Region (NCR). National Capital Region (NCR) is a unique example of inter-state regional development planning for a region, having a total area of over 33500 SqKms spanning over 15 districts in the states of U.P, Haryana, and Rajasthan and National Capital Territory of Delhi, with the Nation Capital as its core. The National Capital Region (NCR) in India was constituted under the NCRPB Act, 1985; the key rationale was to promote balanced and harmonized development of the Region, and to contain haphazard and unplanned urban growth by channelizing the flow and direction of economic growth (on which the urban phenomenon feeds) along more balanced and spatially-oriented paths. National Capital Region (NCR) is a unique example of inter-state regional development planning for a region with NCT-Delhi as its core. The National Capital Region as notified covers an area of about 34,144 sqkms falling in the territorial jurisdictions of four State Governments namely, National Capital Territory of Delhi, Haryana, UP, and Rajasthan and constitutes about 1.60% of the country's land area. Sub-region wise area details are as under:

Sub-Region	Name of the Districts	Number of cities/towns	Area (in sqkms)
Haryana	Faridabad, Gurgaon, Mewat, Rohtak, Sonepat, Rewari, Jhajjhar, Panipat and Palwal	09	13,428
Uttar Pradesh	Meerut, Ghaziabad, Greater Noida (GBN), Noida, Bulandshahr, Hapur and Baghpat	07	10,853
Rajasthan	Alwar&Bhiwadi	02	8,380
Delhi	NCT of Delhi	01	1,483
		Total:19	Total: 34,144

2.0 SCOPE OF WORK AS PER THE ORDER OF HON'BLE NATIONAL GREEN TRIBUNAL DATED 04/12/2014 & 19/01/2015

As per Order of Hon'ble National Green Tribunal (NGT) in its order on 04.12.2015 as under:

"We direct a team of CPCB, DPCC, a Scientist from MoEF, a Scientist from state Boards of State of Rajasthan, State of Haryana and State of Uttar Pradesh to take ambient air quality samples from the entire NCR Delhi at different intervals and times. The samples would be taken during the peak hours as well as non-peak hours. The sample shall definitely be collected in the early morning hours and late evening hours. The complete analysis of this data for all parameters of NAAQS 2006 shall be made and comparison with the national ambient air quality specified in the Notification dated 18th November, 2009 issued by the MoEF in relation to the air quality standards specified therein shall be made. This report shall also identify the environmentally safest period of the day when residents of Delhi would be exposed to minimum injury to their health."

In continuation of the Hon'ble Tribunal hold next hearing dated 12/01/2015 and 19/01/2015 wherein Hon'ble National Green Tribunal (NGT) ordered on 19.01.2015 as under:

"All the directions issued by the Tribunal, particularly in relation to the vehicular pollution shall be carried out by all the concerned agencies without delay and default. The Expert Team (CPCB) shall take ambient air quality sample from all the Borders of Delhi and the adjacent area and submit the analysis reports before the Tribunal prior to the next date of hearing".

The summary of scope of the work in accordance with the decision taken in the meeting dated 26/12/2014 and 11/02/2015 is given in Table 1 and summary of selected Borders of NCT of Delhi considered in the Second Meeting of Committee constituted by Hon'ble NGT and MOEF&CC, Govt. of India is given in Table 2.

Table 1: Scope of work

Sl. No.	Description of Monitoring	Monitoring Period/days as per decisions taken in the two meetings (26/12/2014 and 11/02/2015)	Frequency
1.	Ambient Air Quality monitoring and analysis for SO ₂ , NO ₂ , PM ₁₀ existing monitoring locations/ cities fall under NCR	<ul style="list-style-type: none"> ✓ 1st Set of data: One month (04/12/2014 to 03/01/2015) for existing monitoring stations in Delhi and NCR; ✓ One time monitoring (snap shot) on those cities not monitored in NCR ✓ 2nd Set of data: One month plus (05/01/2015 to 10/02/2015) for existing monitoring stations in Delhi and NCR; 	<ul style="list-style-type: none"> ✓ SO₂, NO₂, (for 4 hourly and 24hourly average monitoring values) ✓ PM₁₀, (for 8 hourly and 24 hourly average monitoring values); ✓ PM_{2.5} (Hourly for 24 hourly average monitoring values)

Sl. No.	Description of Monitoring	Monitoring Period/days as per decisions taken in the two meetings (26/12/2014 and 11/02/2015)	Frequency
2.	Ambient Air Quality monitoring on Selected locations/ Cities and analysis for PM _{2.5} , CO, O ₃ , NH ₃ , C ₆ H ₆	<ul style="list-style-type: none"> ✓ 1st Set of data: One month (04/12/2014 to 03/01/2015) for existing monitoring stations in Delhi and NCR; ✓ One time monitoring (snap shot) on those cities which are not monitored in NCR; ✓ 2nd Set of data: One month plus (05/01/2015 to 10/02/2015) for existing monitoring stations in Delhi and NCR; 	<ul style="list-style-type: none"> ✓ PM_{2.5} (Hourly for 24 hourly average monitoring values) ✓ CO (for 1 hourly average and 8 hourly average values) ✓ O₃ (for 1 hourly average and 8 hourly average values) ✓ NH₃ (24 hourly average monitoring values) C₆H₆ (24 hourly average monitoring values)
3.	Ambient Air Quality monitoring and analysis for SO ₂ , NO ₂ , PM ₁₀ , PM _{2.5} near Borders of NCT Delhi	<ul style="list-style-type: none"> ✓ 3rd Set of data: Two days monitoring in February 2015 month (16/02/2015 & 17/02/2015) on seven Borders of NCT, Delhi as below: <ul style="list-style-type: none"> i.) NH-24 bypass road: Delhi-Moradabad; ii.) NH-2 : Delhi-Agra; iii.) NH-236 : Mehrauli-Gurgaon; iv.) NH-10 : Rohtak Road; v.) NH-1 : Delhi-Ambala; vi.) NH-24 (GT Road); vii.) Noida-GreaterNoida Expressway 	<ul style="list-style-type: none"> ✓ PM₁₀, (for 8 hourly and 24 hourly average monitoring values) ✓ PM_{2.5} (Hourly or 24 hourly average monitoring values); ✓ SO₂, NO₂, (for 4 hourly and 24 hourly average monitoring values)

Table 2: Selected Border Locations/Areas for monitoring of AAQ in NCT of Delhi (Delhi Border Roads)

Sl. no.	Name of Road with number of Expressway/ National Highway/ State Highway	Location of monitoring near to Delhi Border	Monitoring to be conducted by the agencies
1	NH-24 bypass road : Delhi-Moradabad	UP Gate (Hapur Moradabad Road)	U.P. SPCB DPCC (Anand Vihar)
2	NH-2 : Delhi-Agra	Badarpur (Mathura Road)	Haryana SPCB
3	NH-236 : Mehrauli-Gurgaon	Gurgaon (Jaipur Road)	Haryana SPCB
4	NH-10 : Rohtak Road	Tikri Kalan (Bahadurgarh -Rohtak Road)	Haryana SPCB
5	NH-1 : Delhi-Ambala	Narela / Alipur Border Road (Panipat-Karnal Road)	Haryana SPCB
6	NH-24 (GT Road)	Dilshad Garden (J&K Pocket) road approaching to Mohan Nagar (Apsara Border), Ghaziabad	U.P. SPCB CPCB (Dilshad Garden)
7	Noida-Greater Noida Expressway	Border near toll, Road towards Greater Noida Dadri	U.P. SPCB

3.0 STUDY SITE & MONITORING LOCATIONS

As per Hon'ble NGT order dated 04.12.2014 and subsequent minutes of the meeting held on 26.12.2014 at CPCB and in continuation of this Hon'ble NGT further heard the matter on 19.01.2015 and directed to the committee constituted under the Chairmanship of Advisor, MOEF&CC, Govt. of India, the Central Pollution Control Board and State Pollution Control Boards, Pollution Control Committees such as Haryana State Pollution Control Board (HSPCB), Rajasthan State Pollution Control Board (RSPCB), Uttar Pradesh State Pollution Control Board (UPSPCB), Delhi Pollution Control Committee (DPCC) to furnish the data of ambient air quality monitoring of the existing monitoring stations of the respective cities in NCR region (both from manual and continuous monitoring stations) from 4th of December, 2014 to 5th of January, 2015 and 06.01.2015 to 10.02.2015 as a second set of AAQ data of NCT Delhi and NCR. Further, to get an overview of ambient air quality in those cities of NCR, where no AAQ monitoring stations exists, all the SPCB's/PCC' should carry out at least one day monitoring (Snap shots). Furthermore to this, the Hon'ble NGT also directed to "*The Expert Team (CPCB) shall take ambient air quality sample from all the Borders of Delhi and the adjacent area and submit the analysis reports before the Tribunal prior to the next date of hearing*" i.e. 25th February 2015.

The locations for monitoring in NCR are given in Table 3.

4.0 MONITORING PLAN

As per Hon'ble NGT order dated 04.12.2014, 19.01.2015 and subsequent minutes of the meetings held on 26.12.2014 at CPCB and 11.02.2015 in MoEF & CC, the monitoring plan was finalized by the committee constituted by MOEF&CC and Hon'ble NGT. The monitoring shall be conducted as per AAQ Monitoring Guidelines of National (NAMP) project of CPCB. As per the decision taken in the two meetings, the following monitoring strategies were discussed:

- 1) *Ambient Air Quality monitoring and analysis for SO₂, NO₂, PM₁₀ existing monitoring locations/ cities fall under NCR:*
 - ✓ 1st Set of Monitoring plan: One month (04/12/2014 to 03/01/2015) for existing monitoring stations in Delhi and NCR;
 - ✓ One time monitoring (snap shot) on those cities not monitored in NCR;
 - ✓ 2nd Set of monitoring plan: One month plus (05/01/2015 to 10/02/2015) for existing monitoring stations in Delhi and NCR;
- 2) *Ambient Air Quality monitoring on Selected locations/ Cities and analysis for PM_{2.5}, CO, O₃, NH₃, C₆H₆:*
 - ✓ 1st Set of monitoring plan: One month (04/12/2014 to 03/01/2015) for existing monitoring stations in Delhi and NCR;
 - ✓ One time monitoring (snap shot) on those cities which are not monitored in NCR;
 - ✓ 2nd Set of monitoring plan: One month plus (05/01/2015 to 10/02/2015) for existing monitoring stations in Delhi and NCR;
- 3) *Ambient Air Quality monitoring and analysis for SO₂, NO₂, PM₁₀, PM_{2.5} near Borders of NCT Delhi:*
 - ✓ 3rd Set of Monitoring plan: Two days monitoring in February 2015 month (16/02/2015 & 17/02/2015) on **seven Borders of NCT, Delhi** as below:
 - i.) NH-24 bypass road: Delhi-Moradabad;
 - ii.) NH-2 : Delhi-Agra;
 - iii.) NH-236 : Mehrauli-Gurgaon;
 - iv.) NH-10 : Rohtak Road;
 - v.) NH-1 : Delhi-Ambala;
 - vi.) NH-24 (GT Road);
 - vii.) Noida-Greater Noida Expressway

5.0 METHODOLOGY FOR MONITORING & DATA COLLECTION

As per Hon'ble National Green Tribunal order in the application No.21 of 2014, the gaseous and particulate pollutants (parameters) were monitored with a frequency of 1 hourly, 4 hourly, 8 hourly and 24 hourly as per the guidelines of CPCB/MoEF in NCR as per the methodologies given in the National Ambient Air Quality Standards (Table 4).

Table 4: Revised National Ambient Air Quality Standards (NAAQS)
[NAAQS Notification dated 18th November, 2009]

SI. No.	POLLUTANTS	Time Weighted Average	CONCENTRATION IN AMBIENT AIR		METHODS OF MEASUREMENT
			Industrial, Residential, Rural and other Areas	Ecologically Sensitive Area (notified by Central Government)	
1	Sulphur Dioxide (SO ₂), µg/m ³	Annual*	50	20	1. Improved West and Gaeke 2. Ultraviolet Fluorescence
		24 Hours**	80	80	
2	Nitrogen Dioxide (NO ₂), µg/m ³	Annual*	40	30	1. Modified Jacob & Hochheiser (Na Arsenite) 2. Chemiluminescence
		24 Hours**	80	80	
3	Particulate Matter (Size <10µm) or PM ₁₀ µg/m ³	Annual*	60	60	1. Gravimetric 2. TEOM 3. Beta attenuation
		24 Hours**	100	100	
4	Particulate Matter (Size <2.5 µm) or PM _{2.5} µg/m ³	Annual*	40	40	1. Gravimetric 2. TEOM 3. Beta attenuation
		24 Hours **	60	60	
5	Ozone (O ₃), µg/m ³	8 hours**	100	100	1. UV photometric 2. Chemiluminescence 3. Chemical Method
		1 hours **	180	180	
6	Lead (Pb), µg/m ³	Annual *	0.50	0.50	1. AAS/ICP Method after sampling using EPM 2000 or equivalent filter paper 2. ED-XRF using Teflon filter
		24 Hour**	1.0	1.0	
7	Carbon Monoxide (CO), mg/m ³	8 Hours **	02	02	Non dispersive Infra Red (NDIR) Spectroscopy
		1 Hour**	04	04	
8	Ammonia (NH ₃), µg/m ³	Annual*	100	100	1. Chemiluminescence 2. Indophenol blue method
		24 Hour**	400	400	
9	Benzene (C ₆ H ₆), µg/m ³	Annual *	05	05	1. Gas chromatography based continuous analyzer 2. Adsorption and Desorption followed by GC analysis
10	Benzo(a)Pyrene (BaP)- particulate phase only, ng/m ³	Annual*	01	01	Solvent extraction followed by HPLC/GC analysis
11	Arsenic (As), ng/m ³	Annual*	06	06	AAS/ICP method after sampling on EPM 2000 or equivalent filter paper
12	Nickel (Ni), ng/m ³	Annual*	20	20	AAS/ICP method after sampling on EPM 2000 or equivalent filter paper

* Annual Arithmetic mean of minimum 104 measurements in a year at a particular site taken twice a week 24 hourly at uniform interval. ** 24 hourly 08 hourly or 01 hourly monitored values, as applicable shall be complied with 98% of the time in a year. 2% of the time, they may exceed the limits but not on two consecutive days of monitoring.

NOTE: Whenever and wherever monitoring results on two consecutive days of monitoring exceed the limits specified above for the respective category, it shall be considered adequate reason to institute regular or continuous monitoring and further investigation.

6.0 FINDINGS OF AMBIENT AIR QUALITY IN NCT OF DELHI & NCR

AMBIENT AIR QUALITY MONITORING

The analysis of all recorded parameters in the 13 cities of NCR covering 4 states is discussed below. The details of the ambient air quality status during monitoring period is given in Annexure-I.

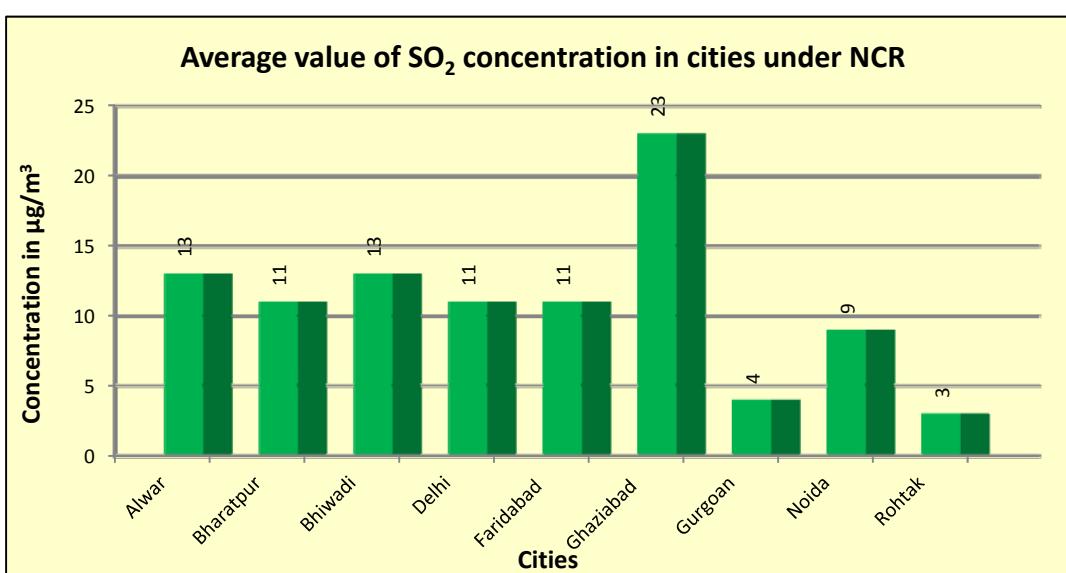

i.) Sulphur Dioxide (SO_2):

During the monitoring period, it has been observed that the average values of the total monitoring period (68 days period- 05.12.2014-10.02.2015) of SO_2 for all the cities ranged from $3\mu g/m^3$ to $23\mu g/m^3$ (Table 4, Figure 2). During the total monitoring period it was observed that all the cities monitored in NCR are within the NAAQS of $80\mu g/m^3$ (24-hourly averages). Therefore, there are no exceedances with respect to 24-hourly NAAQS of $80\mu g/m^3$ of SO_2 (Table 6).

**Table 5: Status of SO_2 in the cities of NCR
(68 days period- 05.12.2014-10.02.2015; 24 Hourly NAAQS 2009- $80\mu g/m^3$)**

City	State	Mode of monitoring	Average of SO_2 ($\mu g/m^3$)		
			1 st set of AAQ data (31 days - period 05.12.2014-04.01.2015)	2 nd set of AAQ data (37 days - period 05.01.2015-10.02.2015)	Average Value of two sets of AAQ data

ii.) Nitrogen Dioxide (NO₂)

During the monitoring period, it has been observed that the average values of the total monitoring period (68 days period- 05.12.2014-10.02.2015) of NO₂ for all the cities ranged from 20 $\mu\text{g}/\text{m}^3$ to 67 $\mu\text{g}/\text{m}^3$ (Table 7, Figure 4). During the total monitoring period for NO₂, it was observed that Delhi exceeds the NAAQS of 80 $\mu\text{g}/\text{m}^3$ (24-hourly averages) for 145 observations out of 581 observations and Faridabad exceeds the 24-hourly NAAQS for 2 observations out of 45 observations (Table 8, Figure 4). The remaining cities are within the National Standard (NAAQS 2009) for NO₂.

iii.) Particulate Matter size less than and equal to 10μm (PM₁₀):

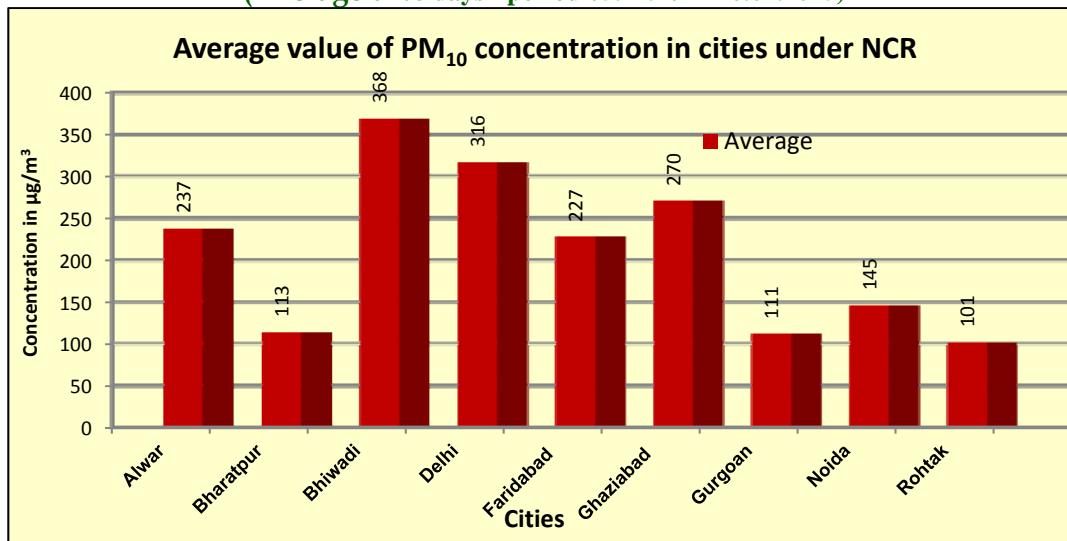

During the monitoring period, it has been observed that the average values of the total monitoring period (68 days period- 05.12.2014-10.02.2015) of PM₁₀ for all the cities ranged from 101 μg/m³ to 368 μg/m³ (Table 9, Figure 5). During the total monitoring period for PM₁₀, it was observed that all the cities exceeds the NAAQS of 100 μg/m³ (24-hourly averages-Table 10, Figure 6). With respect to number of observations in case of Delhi 538 observations are exceeding the national standard out of 545 observations. Whereas, other cities such as Ghaziabad, Noida, Alwar indicating 100% exceedances (Refer Table 10).

iv.) Particulate Matter size less than and equal to 2.5 μm (PM_{2.5})

Particulate Matter size less than and equal to 2.5 μm (PM_{2.5}) has been monitored only at four cities namely Delhi, Faridabad, Gurgaon and Rohtak. During the monitoring period, it has been observed that the average values of the total monitoring period (68 days period- 05.12.2014-10.02.2015) of PM_{2.5} for all the cities ranged between 59 $\mu\text{g}/\text{m}^3$ to 205 $\mu\text{g}/\text{m}^3$ (Table 11, Figure 7). During the total monitoring period for PM_{2.5}, it was observed that all the cities exceeds the NAAQS of 60 $\mu\text{g}/\text{m}^3$ (24-hourly averages-Table 11, Figure 8). With respect to number of observations in case of Delhi, 447 observations are exceeding the national standard out of 558 observations . Faridabad indicating 100% exceedances (Refer Table 12).

vi.) Carbon monoxide (CO)

Carbon monoxide has been monitored only at four cities namely Delhi, Faridabad, Gurgaon and Rohtak. During the monitoring period, it has been observed that the average values of the total monitoring period (68 days period- 05.12.2014-10.02.2015) of CO for all the cities ranged between 0.9 $\mu\text{g}/\text{m}^3$ to 1.8 $\mu\text{g}/\text{m}^3$ (Table 15, Figure 11). During the total monitoring period for CO, it was observed that all the cities exceed the national standard (NAAQS 2009) of 2mg/m³ (8-hourly averages-Table 16, Figure 12). Delhi and Faridabad exceeded 28% of the observations from the national standard in (485 observations out of 1725 observations for Delhi and 52 observations out of 185 observations for Faridabad respectively) and Gurgaon and Rohtak exceeded 5% and 7% of the observations from the national standard.

vii.) Ammonia (NH_3)

Ammonia has been monitored only at six locations in Delhi only. During the monitoring period, it has been observed that the average value of the total monitoring period (68 days period- 05.12.2014-10.02.2015) of NH_3 for all the locations ranged between $31\mu g/m^3$ to $72\mu g/m^3$ (Table 17, Figure 13). During the total monitoring period for NH_3 , it was observed that all the locations of Delhi are within the national standard (NAAQS 2009) of $400\mu g/m^3$ (24-hourly averages-Table 18).

Table 17: Status of NH_3 in the cities of NCR

viii.) **Benzene (C_6H_6)**

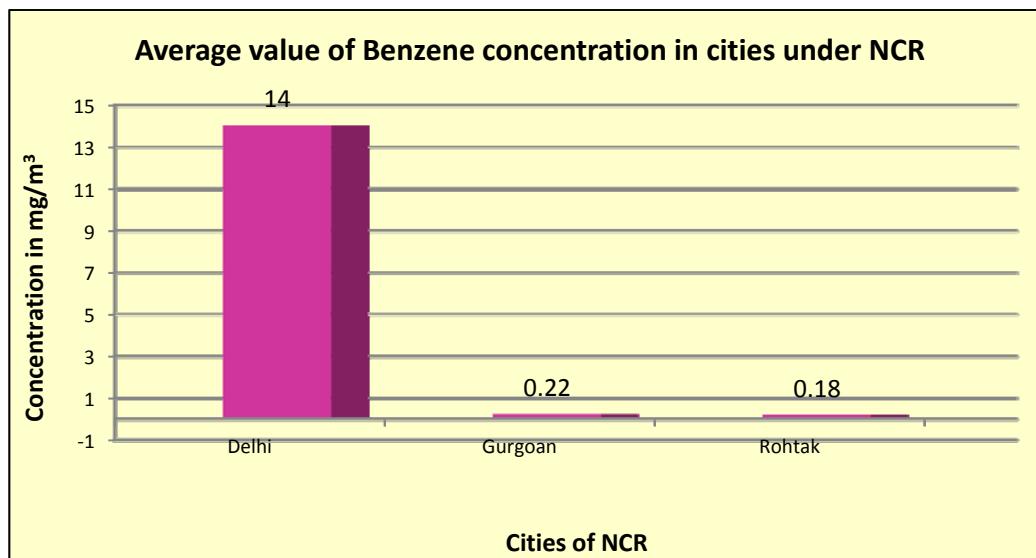

The monitoring observations of benzene (C_6H_6) could not be compared with the national standard as the national standard (NAAQS 2009) for benzene is annual i.e. $5\mu g/m^3$. However, the monitoring data during the period is attached in the Table 19. Benzene has been monitored only at three cities namely Delhi, Gurgaon and Rohtak. During the monitoring period, it has been observed that the average value of the total monitoring period (68 days period- 05.12.2014-10.02.2015) of benzene (C_6H_6) ranged between $0.18\mu g/m^3$ to $14\mu g/m^3$ (Table 19, Figure 14).

**Table 19: Status of Benzene (C_6H_6) in the cities of NCR
(68 days period- 05.12.2014-10.02.2015; Annual NAAQS 2009- $5\mu g/m^3$)**

7.0 EXISTING AMBIENT AIR QUALITY MONITORING NETWORK IN NCR UNDER NAMP &SNAPSHOT (ONE TIME) MONITORING AT FIVE LOCATIONS IN NCR

Some of the cities not covered in regular monitoring in NCR were monitored for one day as per minutes of the meeting dated 26/12/2014 held at CPCB. The cities were Dharuhera, Hissar, Panipat and Sonepat in Haryana and Hapur in Uttar Pradesh. Three parameters namely PM₁₀, NO₂ and SO₂ were monitored in this snapshot monitoring during the first set of monitoring (December 2014 to January 2015). The existing operating Ambient Air Quality monitoring network of NCR under National Network (NAMP) is given in Table 20 and one time monitoring -Snap shot is given in Table 21.

The monitoring data shows that with respect to SO₂, the one day 24 hour average value was minimum in Panipat, Haryana (3 µg/m³) and maximum in Sonepat, Haryana (17 µg/m³). With respect to NO₂ the one day 24 hour average value was minimum in Panipat, Haryana (16 µg/m³) and maximum in Hapur, Uttar Pradesh (45 µg/m³). With respect to PM₁₀ the one day 24 hour average value was minimum in Hissar, Haryana (79 µg/m³) and maximum in Sonepat, Haryana (793 µg/m³), Refer Table 21 Figure 15.

Table 20: Existing Ambient Air Quality Network of NCR under National Network (NAMP)

8.0 ANALYSIS OF AMBIENT AIR QUALITY DATA FOR PEAK HOURS AND NON PEAK HOURS AS PER THE HON'BLE TRIBUNAL ORDER

The available data of ambient air quality during 05th December 2014 to 4th January 2015 is in discrete series and therefore, interpretation of receipt data to link with the peak and non peak hours in Delhi & NCR is not possible presently. The ambient air quality for peak and non-peak hours data compiled for three cities such as Delhi, Gurgaon and Rohtak is given in Table 22 & 23. The peak and non-peak hours interpretation for ambient air quality data could be linked with meteorological conditions as the period of monitoring is winter months. During the winter months, in the lower atmosphere the temperature (inversion) is very low and due to obvious reason mixing height is also very low and pollutants could not be dispersed. Therefore, data especially for peak hours in the evening time indicating higher concentration of NO₂, PM₁₀ and CO (mostly vehicular related parameters) in the lower atmosphere.

**Table 22: Status of ambient air quality during peak hours and non-peak hours in Delhi & NCR
(05th December 2014 to 04th January 2015)**

Locations	Time	SO ₂ µg/m ³	NO ₂ µg/m ³	PM ₁₀ µg/m ³	PM _{2.5} µg/m ³	CO mg/m ³	O ₃ µg/m ³	NH ₃ µg/m ³	C ₆ H ₆ µg/m ³

Note: Figures in parentheses are the number of monitoring stations (manual & continuous) in the city. '-' data not available. All values are in µg/m³ except CO, the concentration of CO is in mg/m³. “—” data has been received as 24-hourly averages thus not included.

9.0 AMBIENT AIR QUALITY MONITORING AT NCT BORDERS

The ambient air quality monitoring for two days (16.02.2015 & 17.02.2015) in the borders of NCT of Delhi (Table 24) showing exceedance of 24-hourly national standards with respect to SO₂, NO₂, PM10 and PM2.5. The data shows that SO₂ and NO₂ are within the 24-hourly National Standard (NAAQS 2009) of 80 µg/m³ in all the borders of NCT of Delhi during the two days of monitoring. With respect to PM10 and PM2.5 all the borders exceeds the 24-hourly National Standard (NAAQS 2009) of 100 µg/m³ and 60 µg/m³ respectively except for Badarpur Border (Delhi-Faridabad ie Delhi Haryana Border) which is within the National Standard..

**Table 24: Status of ambient air quality at the borders of NCT of Delhi
(16th – 17th January 2015)**

NB. ‘-’ data not received

10.0 CONCLUSION

Since there is an inconsistency in the data received from different stakeholders, it is difficult to come out with concrete conclusions. Furthermore, most of the State Pollution Control Boards has not provided data in the desired format of CPCB and in most of the cases the data provided by SPCBs/PCCs as 24 hourly averaged values could not help us to work out peak hours and non-peak hour's concentration of pollutants to establish pollution from vehicular sectors. However, in order to get a statistically acceptable data, a monitoring of ambient air quality is required as per the National Standard (NAAQS) as well as to come out with more scientifically acceptable conclusions. However, comparison of the data (68 days monitoring, border monitoring and snapshot monitoring) has been made with 24 hourly/ 8 hourly averages of NAAQS. Moreover, the yearly annual average data generated under NAMP has been compiled and the trend analysis for three years (2011-2013) is given at **Annexure II**. The summary of the 24-hourly / snapshot monitoring is given below:

10.1) Sulphur dioxide (SO₂):Ambient air quality data of 16 cities for **Sulphur dioxide (SO₂)** reveals that all the cities are within the 24-hourly NAAQS of 80 $\mu\text{g}/\text{m}^3$ in all the monitoring days;

10.2) Nitrogen dioxide (NO₂): Analysis of the ambient air quality data of 16 cities for **Nitrogen dioxide (NO₂)** reveals that all the cities are within the 24-hourly NAAQS of 80 $\mu\text{g}/\text{m}^3$ except for Delhi and Faridabad.

10.3) Particulate Matter size less than and equal to 10 μm (PM₁₀): Ambient air quality data of 16 cities for **Particulate Matter size less than and equal to 10 μm (PM₁₀)** reveals that all the cities exceeded the 24-hourly NAAQS of 100 $\mu\text{g}/\text{m}^3$ in most of the monitoring days.

10.4) Particulate Matter size less than and equal to 2.5 μm (PM_{2.5}): Particulate Matter size less than and equal to 2.5 μm (PM_{2.5}) has been monitored only at four cities namely Delhi, Faridabad, Gurgaon and Rohtak. Analysis of ambient air quality data revealed that all the cities exceeds the NAAQS of 60 $\mu\text{g}/\text{m}^3$ (24-hourly averages).

10.5) Ozone (O₃): Ozone has been monitored only at four cities namely Delhi, Faridabad, Gurgaon and Rohtak. During the total monitoring period for O₃, it was observed that all the cities are within the standard of (NAAQS 2009) of 100 $\mu\text{g}/\text{m}^3$ (8-hourly averages) except for Delhi.

10.6) Carbon monoxide (CO): Carbon monoxide has been monitored only at four cities namely Delhi, Faridabad, Gurgaon and Rohtak. During the total monitoring period for CO, it was observed that all the cities exceed the national standard (NAAQS 2009) of 2mg/ m^3 (8-hourly averages).

10.7) Ammonia (NH₃): Ammonia has been monitored only at six locations in Delhi only. It was observed that all the locations of Delhi are within the national standard (NAAQS 2009) of 400 $\mu\text{g}/\text{m}^3$ (24-hourly average).

10.8) Benzene (C₆H₆): Benzene has been monitored only at three cities namely Delhi, Gurgaon and Rohtak. It has been observed that the average value of the total monitoring period (68 days period- 05.12.2014-10.02.2015) of benzene (C₆H₆) ranged between 0.18 $\mu\text{g}/\text{m}^3$ to 14 $\mu\text{g}/\text{m}^3$. The monitoring observations of benzene (C₆H₆) could not be compared with the national standard as the national standard (NAAQS 2009) for benzene is annual i.e. 5 $\mu\text{g}/\text{m}^3$.

NB. Data for Delhi (Second set of data, Period: 5th January – 10th February, 2015) by CPCB (3 stations) has been received on 23rd February, 2015. Hence, the parameters SO₂, NO₂, PM10, PM2.5, C₆H₆ could not be inserted in the text / report. However, these data sets have been attached in Annexure I.

Minutes of the first meeting on 'Ambient Air Quality Monitoring in NCR' as per Hon'ble National Green Tribunal (NGT) Order dated 04.12.2014 on Application No. 21 of 2014 regarding Air Pollution in Delhi held at CPCB, on 26.12.2014

Venue of the meeting; Conference Room, 2nd floor, CPCB

Date and Time: 26.12.2014 at 11 AM

Agenda: Ambient Air Quality Monitoring in NCR

Record notes of discussion of the meeting held on 26th December, 2014 to finalize the Ambient Air Quality Monitoring plan in NCR Delhi as per Hon'ble National Green Tribunal (NGT) Order dated 04.12.2014 on Application No. 21 of 2014 regarding Air Pollution in Delhi.

In compliance to Hon'ble National Green Tribunal (NGT) Order dated 04.12.2014 on Application No. 21 of 2014 regarding Air Pollution in Delhi, a team of officials from CPCB, DPCC, MoEF, State Boards of Rajasthan, Haryana and Uttar Pradesh have been directed to collect ambient air quality samples from entire NCR Delhi at different intervals and times. In this regard, Dr. Sanjeev Agrawal, Scientist 'D' CPCB briefed the Chairman of the committee on existing monitoring in Delhi and NCR region and the cities covered in NCR within 50 km and 100 km radius of NCT of Delhi. He also expressed that as per NCR Planning Board tentative monitoring plan is to be established in 16 cities (9 cities in Haryana, 5 cities in U.P. and 2 cities in Rajasthan). Further he expressed that except the counter magnet area of NCR, the three states such as Haryana, Uttar Pradesh and Rajasthan has a vast area of 34, 144 sq. km as per Hon'ble NGT Order. With this introduction the state wise discussion on NCT and NCR, existing ambient air quality monitoring were invited from the representative of respective SPCB's from the Chairman of the committee. The officials from state agencies (SPCB's, /PCC's) attending the meeting are attached at Annexure. The agenda of the meeting is given below:

- i. Brief appraisal on existing monitoring stations and Air Quality data in NCR by Rajasthan SPCB, Haryana SPCB, Uttar Pradesh SPCB and DPCC
 - ii. Chalk out the modalities of the entire monitoring plan;
 - iii. Selection of cities for ambient air quality monitoring in NCR;
 - iv. Selection of location and number of location in the selected cities;
 - v. Selection of parameters to be monitored as per National Ambient Air Quality Standard 2009;
 - vi. Co-ordination with CPCB and other team members.
1. Dr. Rashid Hasan, Advisor MoEF & CC, Chairman of the committee suggested that each State Pollution Control Board appraise their respective existing ambient air quality monitoring to the Committee and also provide daily raw data of all the parameters monitored from 5th December to 4th January 2015 by 5th of January 2015 positively through e-mail in CPCB format so that an overview of Ambient Air Quality in NCT/NCR could be worked out and interim report could be submitted to Hon'ble NGT on time.
 2. Dr. A. B. Akolkar, Member Secretary, CPCB, suggested that the regular parameters may be continued to be monitored at all the locations at all the existing 21 manual operating stations as well 11 CAAQM stations operated by CPCB and DPCC. He opined that other parameters like NH₃, CO and O₃ may also be monitored at least at selected locations for at least two days in a week. He also suggested that in this existing monitoring system the 1st step would be to collect the regular data from existing AAQ monitoring stations and Ambient Air Quality Monitoring should be carried out at least once (snap shots) by all the State's/PCC's to get an overview in those cities where no AAQ monitoring stations exists and later on this will done on regular basis by outsourcing procedure.

3. Dr. A. B. Akolkar, Member Secretary, CPCB, further suggested that submission of interim report could be done in time to the Hon'ble Tribunal without any delay then seek some time from Hon'ble Tribunal to conduct monitoring by the respective SPCB's and PCC's (at least for a month) at more locations to expand and mechanize the ambient air quality monitoring network in more cities of National Capital Region (NCR) with the help of outside agencies (Outsourcing of AAQM). He also emphasized that sufficient number of Ambient Air Quality Monitoring Stations (AAQMS) should be established in NCR target area to get a clear picture of AAQ in National Capital Region (NCR).
4. Dr. Rashid Hasan, Advisor MoEF & CC & Dr. A. B. Akolkar, Member Secretary, CPCB, expressed their views that the area of AAQ monitoring of NCT Delhi may be expanded and AAQ should be conducted in circular grids (covering 60 to 100 km each side such as Panipat in North, Palwal and Kosi in south Haryana and Uttar Pradesh respectively, 60 km West of Delhi i.e. Bahadurgarh in Haryana and approx. 60-70 km East of Delhi NCT i.e. Meerut, Buladshahar in Uttar Pradesh) to cover more cities of NCR to study the impact of Air Pollution on the capital city from various sources (Circled grids state wise).
5. Dr. M. P. George, Scientist 'D', DPCC briefed the Committee on the status of air quality in Delhi. He informed that there are 6 CAAQM stations in Delhi out of which regular monitoring is being conducted in 4 stations. He also informed that out of 12 notified parameters 8 are being monitored in the CAAQMS except for B(a)P, Pb, As and Ni. He further stated that DPCC will provide the AAQ data of the above mentioned monitoring period through e-mail, in CPCB excel format.
6. Sh. Dinesh Kumar, Senior Scientist, Haryana SPCB, stated that there are 9 cities in NCR in Haryana state out of which 3 cities such as Faridabad, Gurgaon and Rohtak have regular CAAQ monitoring stations and Faridabad has both continuous and manual stations. A total of 9 parameters are being monitored in these three cities and data of the above mentioned monitoring period shall be provided through e-mail, in CPCB excel format, by 5th January, 2015. He also suggested that Palwal and Mewat (Neru city) may be excluded from the monitoring list at present as they are far away, approximately 60 km to 100km away from Delhi.
7. Sh. R. S. Yadav, Chief Executive Officer, Uttar Pradesh PCB, stated that there are 6 cities in NCR in U.P. state out of which 3 cities such as Ghaziabad, Noida and Meerut has regular manual monitoring stations. A total of 3 parameters are being monitored in the three cities and data of the above mentioned monitoring period shall be provided through e-mail in CPCB excel format by 5th January, 2015.
8. Dr. S. B. Khandelwal, Scientific Officer, Rajasthan PCB, stated that there are 2 cities in NCR in Rajasthan state out of which 1 city (Alwar) has regular manual monitoring stations. A total of 3 parameters (PM10, NO₂, SO₂) are being monitored in the city and data of the above mentioned monitoring period shall be provided through e-mail in CPCB excel format by 5th January, 2015. Dr. Sanjeev Agrawal, Scientist 'D', CPCB informed that the 4 monitoring locations (3 for manual and 1 for continuous) has already been finalized by CPCB for Bhiwadi as per CPCB guidelines. The present monitoring may be conducted in these selected locations in Bhiwadi.
9. Dr. Prashant Gargava, Scientist 'D', CPCB suggested the strategy for monitoring of 12 parameters and opined that initially we may provide the status of air quality with the current data with current logistics and then later appraise to the Hon'ble Tribunal with remaining air quality

parameters. He also expressed that the other parameters may also be outsourced by the respective State Boards/Committee's.

10. Sh. Abhijit Pathak, Scientist 'B', CPCB, informed that in CPCB B(a)P and NH₃ are not being conducted regularly. All the metals are being conducted in Delhi by CPCB and the data will be provided soon. Dr. S. K. Tyagi, Scientist 'D', CPCB suggested that CO may be monitored by NDIR method. He also suggested the names of a few laboratories such as SGS India Pvt. Ltd, Shriram Institute for Industrial Research, Bhagwathi Ana Labs Pvt. Ltd., Vimta Labs., TÜV SÜD South Asia. He further suggested that the critical parameters may be monitored and if outsourced then the laboratory may be asked to conduct monitoring in three consecutive days in a particular city then move on to the next city. Dr. Sanjeev Agrawal, Scientist 'D' PAMS division agreed to provide addresses of all the suggested firms to all the SPCB's/PCC's.
11. Dr. Sanjeev Agrawal, Scientist 'D', CPCB suggested that along with the parameters monitored the meteorological parameters could also be monitored and latest data need be obtained. Further he suggested that the monitoring may be conducted alternate days. While discussing on rates for 12 parameters, Sh. N. K. Gupta, Scientist 'D', CPCB special invitee, agreed to provide the rates on 12 parameters for ambient air quality monitoring which had been carried out in CEPI project.
12. It has been decided that Ambient Air Quality Monitoring should be carried out at least once (snap shots) by all the State's/PCC's to get an overview in those cities where no AAQ monitoring stations exists and later on this will done on regular basis by outsourcing procedure.
13. While discussing on source and ambient monitoring of Delhi and inspection team to collect Stack and Ambient Air Quality samples from and near the Indraprastha Thermal Power station and Badarpur Power Plant of Delhi, DPCC agreed to provide data on this issue to CPCB as per direction of Hon'ble NGT.
14. It was also decided that selection of locations and parameters along with the name of the cities under the National Capital Region (NCR) which need to be monitored for ambient air quality by all the states. It was further decided that after selection of cities by Haryana SPCB (10 cities in Haryana such as Panipat, Sonipat, Ballabgarh, Bahadurgarh, Rohtak, Rewari, Jajjar, Mewat, Palwal and Gurgaon), strategic monitoring plan shall be submitted to CPCB by Haryana SPCB within a short period of time.
15. Shri R. S. Yadav, agreed on less number of locations in existing network of ambient air quality in NCR region (Ghaziabad, Noida and Meerut having 2 stations in each cities) and expressed his views on monitoring strategies for remaining cities such as Greater Noida, Bulandshahar, Hapur and Bagpat. It was decided that selection of locations and parameters along with the name of the cities comes under the National Capital Region (NCR) as per NCR planning Board need to be monitored for ambient air quality in the state of Uttar Pradesh and strategic monitoring plan will be provided to CPCB by Uttar Pradesh SPCB within a short period of time.
16. Dr. M.P. George, DPCC explained that DPCC is running 04 continuous ambient air quality stations in NCT of Delhi and expressed his views on monitoring strategies for Delhi region. It was decided that the strategic monitoring plan will be provided to CPCB by DPCC and possibility could be explored to establish some more AAQ stations in NCT along with selection of locations and parameters under the National Capital Territory (NCT).

17. During the discussion, it was decided that only 2 problematic cities exists in Rajasthan (NCR) i.e., Alwar and Bhiwadi and Dr. S. B. Khandelwal, Scientific Officer, Rajasthan PCB, agreed to provide strategic monitoring plan to CPCB. The AAQ monitoring for Bharatpur city was also discussed and providing data for such sensitive area was agreed.
18. It was unanimously decided by each state agencies that the existing ambient air quality monitoring data during the period (5th December 2014 to 04th January 2015) will be provided to CPCB positively by 05th January 2015 in excel format provided by CPCB to the concerned SPCB's/PCC's (Haryana, Rajasthan, Uttar Pradesh and Delhi Pollution Control Committee).

Finally, *action points by each SPCB's & PCC's* summarizes that all the agencies (stakeholder) shall submit strategic plan for monitoring of AAQ along with number of locations and parameters selected in each major cities of the respective states within NCT of Delhi (covering approx. 1500 sq. km.) and beyond NCT of Delhi in a circular grids (Circular grids of each state fall in NCR in circled shaped of Capital city of Delhi) to cover National Capital Region (NCR) having an area of 34, 144 sq. km as per Hon'ble NGT Order. *The Action Points decided and finalized as below:*

Actions points by each SPCBs/PCCs/CPCB and actions be taken within a time line given by the Committee Constituted by MOEF&CC & Hon'ble NGT

Sl. No.	Actions points to monitor Ambient Air Quality (AAQ) in NCR	Action to be taken by	Timeline for Action to be taken by different agencies
1.	➢ Ambient air quality data format in excel format to be mailed to all the four participating State Boards/PCC's;	PAMS Div. CPCB	30.12.2014
	➢ Rates for 12 parameters monitored for ambient air quality had been carried out under the CEPI project.	ESS Div. CPCB	05.12.2014
2.	➢ Strategic AAQ monitoring plan will be submitted to CPCB for 10 cities in Haryana such as Panipat, Sonipat, Ballabgarh, Bahadurgarh, Rohtak, Rewari, Jajjar, Mewat, Palwal and Gurgaon along with selection of locations and parameters.	HSPCB	10.01.2015
3.	➢ Strategic AAQ monitoring plan will be submitted to CPCB for NCR in U.P. for cities such as Greater Noida, Bulandshahar, Hapur, Bagpat and Kosi etc. along with selection of locations and parameters and possibility to establish some more AAQ stations in Ghaziabad, Noida and Meerut (presently having only 2 stations in each cities)	UP SPCB	10.01.2015
4.	➢ Strategic AAQ monitoring plan will be submitted to CPCB for Delhi and possibility to establish some more AAQ stations in NCT along with selection of locations and parameters under the National Air Monitoring Programme (NAMP); ➢ DPCC to provide data to CPCB on Stack and Ambient Air	DPCC DPCC	10.01.2015 05.01.2015

	Quality data from and near the Indraprastha Thermal Power station and Badarpur Power Plant of Delhi.		
5.	➢ Strategic AAQ monitoring plan to CPCB for 2 problematic cities in Rajasthan (NCR) i.e. Alwar and Bhiwadi and one sensitive area to cover Bharatpur city also.	Rajasthan SPCB	10.01.2015
6.	➢ Data of existing ambient air quality monitoring stations during the period (5 th December 2014 to 04 th January 2015) to be provided to CPCB by 5 th January 2015. ➢ Furthermore Ambient Air Quality Monitoring should be carried out at least once (snap shots) by all the State's/PCC's to get an overview in those cities where no AAQ monitoring stations exists and later on this will done on regular basis by outsourcing procedure.	HSPCB, RSPCB, UP SPCB & DPCC	05.01.2015
7.	➢ Regular parameters to be continued to monitor at all the locations in Delhi at all the existing 21 manual operating stations as well as 11 CAAQM stations operated by CPCB and DPCC. Other parameters like NH ₃ , CO and O ₃ also to be monitored at least at selected locations for at least two days in a week.	Air Lab CPCB & DPCC	05.01.2015
8.	➢ CPCB agreed to provide addresses of all the suggested firms to all the SPCB's/PCC's	PAMS CPCB	26.12.2014

Note: CPCB- Central Pollution Control Board, HSPCB-Haryana State Pollution Control Board, UPSPCB-Uttar Pradesh State Pollution Control Board, RSPCB-Rajasthan State Pollution Control Board, DPCC-Delhi Pollution Control Committee

Minutes of the Second Meeting on `Ambient Air Quality Monitoring in NCT Delhi & NCR' as per Hon'ble National Green Tribunal (NGT) Order dated 19.01.2015 on Application No. 21 of 2014 regarding Air Pollution in Delhi held at MoEF & CC on 11.02.2015

Venue of the meeting; Room No. P-225, 2nd Floor, MoEF & CC

Date and Time: 11.02.2015 at 3.00 PM

Agenda: Ambient Air Quality Monitoring in NCR

Record notes of discussion of the meeting held on 11th February, 2015 to finalize the Ambient Air Quality Monitoring plan at Borders of NCT of Delhi and in NCR as per Hon'ble National Green Tribunal (NGT) Order dated 19.01.2015 on Application No. 21 of 2014 regarding Air Pollution in Delhi.

In compliance to Hon'ble National Green Tribunal (NGT) Order dated 04.12.2014, a committee constituted earlier with a team of officials from CPCB, DPCC, MoEF, State Boards of Rajasthan, Haryana and Uttar Pradesh collected ambient air quality samples, analyzed from the entire NCR at different intervals and times and reported to the Hon'ble Tribunal on 19.01.2015. In continuation to that the Hon'ble NGT further directed that "all the directions issued by the Tribunal, particularly in relation to the vehicular pollution shall be carried out by all the concerned agencies without delay and default. The Expert Team (CPCB) shall take ambient air quality sample from all the Borders of Delhi and the adjacent area and submit the analysis reports before the Tribunal prior to the next date of hearing". The officials from state agencies (SPCB's/PCC's) attending the meeting are attached at Annexure. The agenda wise discussion and decisions taken in the meeting is given below:

Agenda 1. Actions to be taken by different stake holders as per the previous order and subsequent meeting dated 26.12.2014 held at CPCB, Delhi;

1. Dr. Sanjeev Agrawal, Scientist 'D' CPCB briefed the committee that as per last meeting dated 26.12.2014 and informed that the complete data for 8 parameters and the strategic ambient air quality monitoring plan for cities under NCR has not been received from different stake holders. Dr. Rashid Hasan, Advisor MoEF & CC suggested that all SPCBs should submit complete data for 8 parameters as well as the strategic plan for regular ambient air quality monitoring in NCR region.
2. Shri S. B. Khandelwal, SO, RSPCB informed that the three air quality monitoring stations at Bhiwadi will be started shortly at the sites finalized by CPCB. He also agreed that one week monitoring will be conducted at Bharatpur and data will be sent to CPCB.
3. Dr. Neeraj Chaturvedi, S.A. UPPCB Noida informed that one more air quality monitoring station with PM_{2.5} has been started recently by UPPCB in Noida and that station will be upgraded to three regular parameters such as SO₂, NO₂, PM₁₀.
4. Ms. Sapna Srivastava, Asst. Scientific Officer, UPPCB, Ghaziabad agreed that the monitoring will be conducted at the Apsara Border (NH-24 GT Road) and not in Loni border and the data of already functional air quality monitoring station at Noida Regional Office will be furnished as the station is in the border itself within specified kilometers/radius
5. Dr. P.K.M.K. Das, Scientist 'C', HSPCB, agreed to establish regular monitoring station under NAMP at Jhajjar, Mewat, Daruhera, Hissar, Sonepat and Panipat.

Agenda 2. As per the recent order dated 19.01.2015 with respect to parking and air pollution on metalled roads in Delhi, establishment of ambient air quality monitoring (AAQM) stations and procurement of minimum 1 week data from Lajpat Nagar and Karol Bagh area of Delhi;

6. Dr. Sanjeev Agrawal informed that during hearing on 19.01.2015, Hon'ble NGT searched for ambient air quality data with respect to parking lot at Lajpat Nagar and Karol Bagh. In this regards, Dr. D. Saha, Scientist 'D' pointed out that parking lot monitoring is not ambient air quality monitoring. Further Dr. M. P. George, Scientist

'D', DPCC suggested that Hon'ble NGT verbally asked the air quality data for Lajpat Nagar and Karol Bagh. It was therefore, decided that the air quality monitoring will not be performed at these locations.

Agenda 3. Finalization of interim report and period of data to be included therein;

7. Dr. Sanjeev Agrawal suggested that another one month data may be submitted to CPCB and to explore the possibility to insert in the final report which is to be submitted to Hon'ble NGT before the next date of hearing. Dr. Rashid Hasan suggested that air quality data for the cities attempted earlier including cities left earlier from 06.01.2015 to 10.02.2015 may be given by all SPCBs/PCCs to CPCB (CPCB data format) by 16th February 2015 for finalization of report.

Agenda 4. Ambient air quality monitoring at all the Borders of NCT of Delhi flanking National Capital Region (NCR);

8. Dr. Rashid Hasan, Advisor MOEF&CC explained that the monitoring will be conducted by the Expert Team as indicated in the Hon'ble NGT Order which means a committee constituted during the first meeting with a team of officials from CPCB, DPCC, MoEF, State Boards of Rajasthan, Haryana and Uttar Pradesh.
9. Dr. Sanjeev Agrawal briefed the committee that as per Transport Deptt. (Statistics Report), there are 18 major Borders in National Capital Region (NCR), however, as per Hon'ble Tribunal Order the committee may consider AAQ monitoring at major seven Borders where National Highways approaching to respective states like Haryana, U.P., and across Haryana -Rajasthan Border.
10. Dr. P.K.M.K. Das, Scientist 'C', HSPCB, informed that as there are three regular monitoring stations one each at Faridabad, Gurgaon and Rohtak within the range of 6 Km from NCT border and may be considered as Border Air Quality data. In this regard, Dr. Sanjeev Agrawal suggested that as per the AAQ guidelines the air quality should be within the range of 1-2 km. Dr. D. Saha suggested that, air quality monitoring will be conducted by respective SPCBs within 1 km range from the check post and not on the roadside and the distance from the check post shall be mentioned by the monitoring team. It was finally decided by the expert committee that air quality monitoring at Border's of Delhi shall be conducted as per the table given below:

Sl. no.	Name of Road with number National Highway/ State Highway	Location of monitoring near to Delhi border	Monitoring to be conducted by the agencies
1	NH-24 bypass road : Delhi-Moradabad	DPCC at Anand Vihar UP PCB near U.P. Gate (Hapur Moradabad Road)	DPCC U.P. SPCB
2	NH-2 : Delhi-Agra	Badarpur (Mathura Road)	Haryana SPCB
3	NH-236 : Mehrauli-Gurgaon	Gurgaon (Jaipur Road)	Haryana SPCB
4	NH-10 : Rohtak Road	Tikri Kalan (Bahadurgarh Road)	Haryana SPCB
5	NH-1 : Delhi-Ambala Road	Narela / Alipur Road (Panipat Road)	Haryana SPCB
6	NH-24 Main GT Road	Dilshad Garden (J&K Pocket) road approaching to Mohan Nagar (Apsara theatre)	U.P. SPCB CPCB (Dilshad Garden)
7	Noida-Greater Noida Expressway	Boarder near toll, Road towards Greater Noida-Dadri	U.P. SPCB

11. The date of monitoring was finalized by the committee as 16th and 17th February 2015 and data will be submitted to CPCB by 19th February, 2015 12.00 PM. The parameters to be monitored were SO₂, NO₂, PM₁₀, PM_{2.5} as Dr. R. C. Srivastava, Scientist 'C', CPCB pointed out that all the 8 parameters cannot be monitored at check post in such short period of time.

Agenda 5. Inspection of hot mixture plants in NCT of Delhi by a team of DPCC and CPCB;

12. Regarding inspection of Hot mixture plants running in Delhi, Dr. Sanjeev Agrawal suggested that, Mr. A. Chattopadyay, Scientist D, CPCB may coordinate with DPCC and submit the report to PAMS Division, CPCB by 19th February 2015.

Agenda 6. Comments on Capping of cars by NCT of Delhi, DPCC and CPCB;

13. Upon discussion on Capping of cars by NCT of Delhi, Dr. Rashid Hasan suggested that DPCC will provide comments to CPCB through email by 16th February, 2015.

Finally, actions points to monitor Ambient Air Quality (AAQ) Monitoring along with time line is attached (**Annexure-I**).

The meeting ended with thanks to the Chair

Actions points to monitor Ambient Air Quality (AAQ) Monitoring in NCT of Delhi & NCR by each SPCBs/PCCs/CPCB along with time line given by the Committee Constituted by MOEF&CC & Hon'ble NGT

Sl. No.	<i>Actions points to monitor Ambient Air Quality (AAQ) in NCR</i>	<i>Action to be taken by</i>	<i>Timeline for Action to be taken by different agencies</i>
1.	➢ Ambient air quality data format in excel format to be mailed to all the four participating State Boards/PCC's;	PAMS Div. CPCB	12.02.2015
2.	➢ Strategic AAQ monitoring plan will be submitted to CPCB for 10 cities in Haryana such as Panipat, Sonipat, Ballabgarh, Bahadurgarh, Rohtak, Rewari, Jajjar, Mewat and Gurgaon along with selection of locations and parameters.	HSPCB	19.02.2015
3.	➢ Strategic AAQ monitoring plan will be submitted to CPCB for NCR in U.P. for cities such as Greater Noida, Bulandshahar, Hapur, Bagpat etc. along with selection of locations and parameters and possibility to establish some more AAQ stations in Ghaziabad, Noida and Meerut (presently having only 2 stations in each cities)	UP SPCB	19.02.2015
4.	➢ Strategic AAQ monitoring plan will be submitted to CPCB for Delhi and possibility to establish some more AAQ stations in NCT along with selection of locations and parameters	DPCC	19.02.2015
5.	➢ Strategic AAQ monitoring plan will be submitted to CPCB for 2 cities in Rajasthan (NCR) i.e. Alwar and Bhiwadi and one sensitive city i.e. Bharatpur.	Rajasthan SPCB	19.02.2015
6.	➢ Ambient air quality data for all the parameters such as SO ₂ , NO ₂ , PM ₁₀ , PM _{2.5} , CO, O ₃ , NH ₃ , C ₆ H ₆ , B(a)P and metals (Pb, Ni & As) whichever be monitored for existing ambient air quality monitoring stations in NCR during the period (05 th January 2015 to 10 th February 2015) to be provided to CPCB.	HSPCB, RSPCB, UP SPCB, DPCC & Air Lab CPCB	16.02.2015
7.	➢ Ambient air quality data for all 7 major Borders of NCT of Delhi (Four borders will be monitored by Haryana SPCB and three borders will be by U.P. SPCB) for 16 th and 17 th February, 2015 and data to be provided to CPCB.	HSPCB & UP SPCB,	19.02.2015
8.	DPCC & Air lab CPCB shall provide the data of existing AAQM stations (Anand Vihar-DPCC and Dilshad Garden-CPCB) at NCT Border for 16 th and 17 th February, 2015 to CPCB.	DPCC & Air Lab CPCB	19.02.2015
9.	➢ Joint inspection report on Hot mixing plant running in Delhi shall be provided to CPCB.	DPCC & SSI Div., CPCB	19.02.2015
10.	➢ Comments on Capping of cars in Delhi shall be provided by DPCC to CPCB.	DPCC to first provide CPCB	16.02.2015

Note: CPCB- Central Pollution Control Board, HSPCB-Haryana State Pollution Control Board, UPSPCB-Uttar Pradesh State Pollution Control Board, RSPCB-Rajasthan State Pollution Control Board, DPCC-Delhi Pollution Control Committee

Annexure - III

Inspection Report of alleged Hot Mixture Plants in and around Vikas Marg Area of Delhi

As per Order of National Green Tribunal, Principal Bench, New Delhi dated January 19, 2015 in regard to Appeal No 21/2014 and M.A. No 37/2015 (in the Matter of Vardhaman Kaushik Vs. Union of India & Others), a inspection was made on February 18, 2015 in and around the Vikas Marg, specially the areas, as reported by the Applicant, i.e., Opposite Nirman Vihar Metro Station, SBI Rajdhani Enclave, PNB Preet Vihar and Bihari Colony for ascertaining the existence of any such Hot Mixture Plant and associated problems, if any, by Shri Abhijit Chattopadhyay, Scientist D, Ms Deepa Chaudhary, SRF of Central Pollution Control Board, and Shri M.I Siddiqui, Environmental Engineer of Delhi Pollution Control Committee.

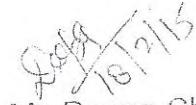

- ❖ The team visited all the areas by moving into the Roads, Lanes and by lanes to find the existence of any **Movable/Immovable Hot Mixture Plant** and see the problems of the area, especially to the residents and the other establishments. However, no such establishments could be seen by the team during the inspection.
- ❖ First visit was made to **Nirman Vihar and Opposite Nirman Vihar Area** i.e. Swasthya Vihar and discussed with different residents of the area and also contacted Swasthya Vihar Club, Ministry of Health Co-operative House Building Society (Shri Krishna Nand Club Office Manager). It was informed that 'no such activity' in this locality has been noticed by them in near past'.
- ❖ Next visited to **New Rajdhani Enclave** and contacted the Association members - Shri Satyapal, President and Shri Vishnu Gupta, Secretary of the Association and also Shri Nayyar, Active Member of the Association. Their opinion was also in the same direction that they have not noticed this type of activites.
- ❖ Then visited to **Preet Vihar** and contacted to the members of Residents Welfare Association - Shri M.K Sikhri President and Shri Arun Bansal, Secretary of Residents Welfare Association and also contacted some local residents of the locality and got informed that 'no such activity' in this area has been noticed by them in near past'.
- ❖ Last of all visits was made to **Bihari Colony**, which is far apart from the above areas and near to Shahdara. There also the team contacted the residents of the locality for getting the first hand information regarding the operation of Hot Mixture Plant. Shri Subash Ahuja Hardware Shop Owner, Shri R.B Sharma Owner of Upkar Property Dealer in Bihari Colony informed that they have not seen any such activities which may cause nuisance to the area.
